Corus Construction & Industrial

## Ahead in the field

**Steel plate and structural sections  
for offshore applications**

# Ahead in the field worldwide

## Technically capable

Corus offers high quality products, project management and service to the international offshore oil and gas industries.

Corus have unique capabilities in products and support services, so whether designer, contractor or fabricator, we have much to offer. Our product range is both modern and extensive with an accompanying project management service which is specifically designed to support the requirements of those engaged in international offshore oil and gas projects, from small jobs to the very largest.

### International Experience

Corus has developed an enviable reputation for its offshore products and technology. Over the last quarter of a century we have delivered over 2,000,000 tonnes of high quality structural steel to oil and gas bearing regions of the world including the Caspian, Gulf of Mexico, Middle East, Asia, West Africa and the North Sea.

### Product Range

Corus manufactures a comprehensive range of offshore structural plates and sections to Offshore Specifications to BS7191, EN 10225, and API grades as well as a variety of other international and proprietary specifications.

We have products covering the 355, 420 and 460 yield strength ranges in structural plate and sections. In addition we have an extensive range of ship plate grades which are increasingly in use for FPSO's. We hold quality approvals to ISO9001, from all the main Classification Societies and many other organisations.

Our plates range from 6 to 120mm thick with lengths up to 15m and widths up to 3750mm.

Our sections range includes beams, columns, angles and channels with beams from 127 x 76mm to 914 x 419mm.

Non-standard and tailored sizes are often available so please talk to us to discuss your needs.

We also have technical brochures detailing our product capabilities and how they can be used. Please contact our Energy Sales Manager on +44 (0) 1724 402119 to discuss your requirements.

### Product processing

Corus also offers a comprehensive range of plate and section fabricating and processing, which includes can rolling, welding, shotblasting, priming, bevelling, cutting, profiling, drilling and so on. We will be pleased to offer advice and quote for work.

### Manufacturing Technology

Corus has invested heavily in its steelmaking, rolling and processing plants. Some of our secondary steelmaking technology is amongst the world's most sophisticated. These investments ensure our steels have very low sulphur and phosphorous, with excellent cleanness. Our rolling technology assures consistent properties and accurate dimensions. Products are produced using normalising, thermomechanical rolling, roller quench and tempering depending on the grade and specific technical requirement.

### Offshore Service Package

Making quality products is only part of the story. Corus recognises that large oil and gas projects require first rate project management, logistics and product support.

Large and complex projects require the commitment of a company with the skills, experience and resources to deliver. We have long been an active partner in major projects be they offshore engineering, mining or construction, operating worldwide.

Corus offers the following service package that will make every Offshore Oil and Gas project a success:

- Dedicated mill-based project manager
- Quick start material
- Single point of contact
- Electronic document management
- Customer Technical Services

### Contacts
